

# SEPHRA® Auto Breeze 3052 EX

The Auto Breeze is a high quality candy floss machine with a large tubular heating element. The taller heating element allows you to produce twice the amount of candy floss as the regular Breeze candy floss model.

Manual "accu" control enables you to adjust the voltage of the machine for perfect results. No other adjustments are needed for this single switch machine, the operation and use are very simple, even for a beginner. The Auto Cool Down simplifies the operation of the machine by preventing the spinner head clogging.

## Specifications

**"IDEAL FOR KIOSKS, CARNIVALS AND MARKETS"**

# SEPHRA®

## Optional Accessories

### Candy Floss Cart - 3149

The candy floss cart is an accessory that will add a special edge to your business. The candy floss cart stands 98cm tall and is specifically made for the Floss Boss Candy Floss Machine.

### Candy Floss Domes - 3938 - 3943

It is recommended that all candy floss machines be operated with a half or full dome floss bubble to protect yourself and customers from flying sugar crystals. Sugar crystals form when the spinner gets overloaded, and then are ejected from the machine.

### Flossine Colouring

Available in Strawberry Pink, Cherry Red, Bubble Gum Blue and Vanilla Pink, Flossine colouring adds a professional touch to your candy floss. An array of different coloured candy balls will attract the crowds.

### Candy Floss Sticks

Whether they're wooden or paper candy floss sticks, you will need sticks to spin your cotton candy on. Our candy floss sticks have been specifically sourced with quality and price in mind.
